Wichtige Sicherheits-Hinweise

1. Bitte lesen Sie diese Hinweis sorgfältig durch.
2. Heben Sie diese Anleitung für den späteren Gebrauch auf.
3. Vor jedem Reinigen ist das Gerät vom Stromnetz zu trennen. Verwenden Sie keine Flüssig- oder Aerosolreiniger. Am besten eignet sich ein angefeuchtetes Tuch zur Reinigung.
4. Die Netzanschluß-Steckdose soll nahe dem Gerät angebracht und leicht zugänglich sein.
5. Das Gerät ist vor Feuchtigkeit zu schützen.
6. Bei der Aufstellung des Gerätes ist auf sicheren Stand zu achten. Ein Kippen oder Fallen könnte Beschädigungen hervorrufen.
7. Beachten Sie beim Anschluß ans Stromnetz die Anschlußwerte.
8. Dieses Gerät kann bis zu einer Außentemperatur von maximal 40°C betrieben werden.

Battery safety warning:

DO NOT throw the battery in fire.

DO NOT short circuit the contacts.

DO NOT disassemble the battery.

DO NOT throw the battery in municipal waste.

The symbol of the crossed out wheeled bin indicates that the battery should not be placed in municipal waste.

CAUTION

Risk of explosion if battery is replaced by an incorrect type.

Dispose of used batteries according to the instructions.

“VORSICHT”

Explosionsgefahr bei unsachgemäßen Austausch der Batterie. Ersatz nur durch denselben oder einem vom Hersteller empfohlenem ähnlichen Typ. Entsorgung gebrauchter Batterien nach Angaben des Herstellers.

Class B:**FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

RF exposure warning (WiFi)

This equipment must be installed and operated in accordance with provided instructions and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be providing with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the EUT transmitting at the specified power level in different channels.

RF exposure warning (For Bluetooth)

The equipment complies with FCC RF exposure limits set forth for an uncontrolled environment.

The equipment must not be co-located or operating in conjunction with any other antenna or transmitter.

Canada, Industry Canada (IC) Notices

This Class B digital apparatus complies with Canadian ICES-003 and RSS-210. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Radio Frequency (RF) Exposure Information

The radiated output power of the Wireless Device is below the Industry Canada (IC) radio frequency exposure limits. The Wireless Device should be used in such a manner such that the potential for human contact during normal operation is minimized.

This device has been evaluated for and shown compliant with the IC Specific Absorption Rate ("SAR") limits when installed in specific host products operated in portable exposure conditions. **(For WiFi)**

This device has also been evaluated and shown compliant with the IC RF Exposure limits under portable exposure conditions. (antennas are less than 20 cm of a person's body). **(For Bluetooth)**

Canada, avis d'Industry Canada (IC)

Cet appareil numérique de classe B est conforme aux normes canadiennes ICES-003 et RSS-210.

Son fonctionnement est soumis aux deux conditions suivantes : (1) cet appareil ne doit pas causer d'interférence et (2) cet appareil doit accepter toute interférence, notamment les interférences qui peuvent affecter son fonctionnement.

Informations concernant l'exposition aux fréquences radio (RF)

La puissance de sortie émise par l'appareil de sans fil Dell est inférieure à la limite(1.6W/Kg) d'exposition aux fréquences radio d'Industry Canada (IC). Utilisez l'appareil de sans fil Dell de façon à minimiser les contacts humains lors du fonctionnement normal.

Ce dispositif a été évalué pour et démontré conforme à la Taux IC d'absorption spécifique ("SAR") des limites(1.6W/Kg) lorsqu'il est utilisé dans des conditions d'exposition portatifs. (**For WiFi**)

Ce périphérique a également été évalué et démontré conforme aux limites d'exposition aux RF d'IC dans des conditions d'exposition à des appareils portables. (les antennes sont moins de 20 cm du corps d'une personne). (**For Bluetooth**)

电池安全警告:

- ◎ 勿将电池扔于火中。
- ◎ 勿将电池接点短路。
- ◎ 不可拆解电池。
- ◎ 不乱将电池当成一般废弃物处理。
- ◎ 打叉的垃圾桶符号表示电池不应该被放置到一般废弃堆中。

注意:

- ◎ 更换不正确型号类型的电池, 将产生爆炸危险。
- ◎ 请根据使用说明处理用过的电池。

1. Introduction

1.1 Product Introduction

Thank you very much for purchasing TSC bar code printer.

Enjoy TSC's reputation for cost-efficient, high durability printers with the Alpha-4L economical receipt printer. The Alpha-4L is a comfortable, light-weight printer capable of working with any mobile receipt printing application where you need quick, simple receipts on demand. Our Alpha-4L is designed for a rough life, inside the IP54-rated environmental case to resist dust and water and with its rubber over-mold design prepared to take up to a five foot fall and keep printing. These small and light printers can be worn comfortably for a full shift, without interfering with the user's tasks. Use USB, Bluetooth, optional Wireless or serial to connect to a mobile computer or even a smart phone and produce clear easy-to-read receipts hour after hour.

This document provides an easy reference for operating the Alpha-4L.

To print label formats, please refer to the instructions provided with your labeling software; if you need to write the custom programs, please refer to the TSPL/TSPL2 programming manual that can be found on the accessories CD-ROM or on TSC website at <http://www.tscprinters.com>.

- Applications
 - Portable point of sale
 - Retail item marking, markdowns, shelf labeling & shelf talkers
 - Labels for shipping & receiving
 - Inventory control
 - Cross-docking
 - Pick, pack & apply operations
 - Print pick tickets
 - Logistics receipts

1.2 Product Features

1.2.1 Printer Standard Features

The printer offers the following standard features.

| Product standard feature |
|---|
| Direct thermal printing |
| Black mark reflective sensor (center position , black mark in back side) |
| Gap transmissive sensor (Fixed, center of offset 2.75 mm to right from center) |
| Head open sensor |
| Peeler sensor |
| 2 operation buttons (On/off and feed) |
| 3 LEDs for printer status, 3 LEDs for battery status |
| USB 2.0 (full speed) interface |
| Class 2 Bluetooth 2.1 module |
| 32 MB SDRAM memory |
| 16 MB FLASH memory |
| Micro SD card reader for memory expansion up to SDHC 4G (max.) |
| DC 7.2V/5800 mAh Li-ion rechargeable battery |
| Real time clock |
| Powerful 32 bit 200 MHz RISC processor |
| Eltron® EPL and Zebra® ZPL emulation languages support |
| Internal 8 alpha-numeric bitmap fonts |
| Internal Monotype Imaging® true type font engine with one CG Triumvirate Bold Condensed scalable font |
| Fonts and bar codes can be printed in any one of the four directions (0, 90, 180, 270 degree) |
| Downloadable fonts from PC to printer memory |
| Downloadable firmware upgrades |
| Bar code, graphics/image printing |

| Supported bar code | Supported image |
|--|--|
| 1D bar code Code128 subsets A.B.C, Code128UCC, EAN128, Interleave 2 of 5, Code 39, Code 93, EAN-13, EAN-8, Codabar, POSTNET, UPC-A, UPC-E, EAN and UPC 2(5) digits, MSI, PLESSEY, China Post, ITF14, EAN14, Code 11, TELPEN, PLANET, Code 49, Deutsche Post Identcode, Deutsche Post Leitcode, LOGMARS | 2D bar code CODABLOCK F mode, DataMatrix, Maxicode, PDF-417, Aztec, MicroPDF417, QR code, RSS Barcode (GS1 Databar) |

1.2.2 Printer Optional Features

The printer offers the following optional features.

| Product option feature | User option | Factory option |
|---|-----------------------|----------------------------------|
| 2" LCD (Liquid crystal display), 128 x 64 pixels resolution w/white LED backlight (with 4 buttons and 2 LEDs) | <input type="radio"/> | <input checked="" type="radio"/> |
| WiFi module | <input type="radio"/> | <input checked="" type="radio"/> |
| Zebra® CPCL emulation language support | <input type="radio"/> | <input checked="" type="radio"/> |
| Media sensor position (position selectable – right/left/center position-factory adjustment, default – center position) | <input type="radio"/> | <input checked="" type="radio"/> |
| Linerless kit | <input type="radio"/> | <input checked="" type="radio"/> |

| | | |
|---|-----------------------|--|
| Mini USB cable | <input type="radio"/> | |
| Mini USB to RS-232 (serial) converter cable | <input type="radio"/> | |
| IP54-rated environmental case with shoulder strap (for standard model) | <input type="radio"/> | |
| IP54-rated environmental case (for standard model) | <input type="radio"/> | |
| IP54-rated environmental case with shoulder strap (for linerless model) | <input type="radio"/> | |
| IP54-rated environmental case (for linerless model) | <input type="radio"/> | |
| Shoulder strap | <input type="radio"/> | |
| Vehicle power adaptor | <input type="radio"/> | |
| DC 7.2V/5800 mAh Li-ion rechargeable battery | <input type="radio"/> | |
| Charger station 1 cell | <input type="radio"/> | |
| Charger station 4 cell | <input type="radio"/> | |
| Belt strap (standard for linerless model) | <input type="radio"/> | |
| Adapter for 0.75" & 1" paper core (standard for linerless model) | <input type="radio"/> | |

1.4 Print Specifications

| Print Specifications | |
|--|--|
| Print head resolution (dots per inch/mm) | 203 dots/inch (8 dots/mm) |
| Printing method | Direct thermal |
| Dot size (width x length) | 0.125 x 0.125 mm (1 mm = 8 dots) |
| Print speed (inches per second) | Max. 4 ips (100 mm/sec) 2,3 ips for peeler mode |
| Max. print width | 4.09" (104 mm) |
| Max. print length | 90" (2286 mm) |
| Printout bias | Vertical: 1 mm max. Horizontal: 1 mm max. |

1.5 Media Specifications

| Media Specifications | |
|----------------------------|---|
| Media roll capacity | Max. 2.65" (67.3 mm) OD |
| Media core diameter | 12.7 mm ~ 25.4 mm (0.5" ~ 1") ID core |
| Media type | Continuous, die-cut, black mark, External fan-fold, receipt, Linerless label (w/ linerless kit) |
| Media wound type | Outside wound |
| Media width | 50.8 mm ~ 112 mm |
| Media thickness | 0.055 mm ~ 0.165 mm |
| Label length | 12.7 mm ~ 2286 mm |
| Label length (peeler mode) | 25.4 ~ 152.4 mm (1" ~ 6") |
| External fan-fold media | Stack height: 70 mm (2.75") Page length: 152 mm ~ 305 mm (6" ~ 12") |
| Black mark | Min. 8 mm (W) x 2 mm (H) |
| Gap height | Min. 2 mm |

2. Operations Overview

2.1 Unpacking and Inspection

This printer has been specially packaged to withstand damage during shipping. Please carefully inspect the packaging and printer upon receiving the bar code printer. Please retain the packaging materials in case you need to reship the printer.

Unpacking the printer, the following items are included in the carton.

- One printer unit
- One Li-ion rechargeable battery (5800 mAh)
- One Windows labeling software/Windows driver CD disk
- One quick installation guide
- One auto-switching AC adaptor
- One belt clip

If any parts are missing, please contact the Customer Service Department of your purchased reseller or distributor.

2.2 Printer Overview

2.2.1 Front View

Note:

* The media sensor position is selectable by factory adjustment. Please refer to this figure for default settings. (Default – center position)

* For LCD control panel (option), please refer to [subsection 2.3.2](#) for more details.

2.2.2 Rear View

Note:

* Recommended MicroSD card specification.

| SD card spec | SD card capacity | Approved SD card manufacturer |
|-------------------|------------------|-------------------------------|
| V1.0, V1.1 | MicroSD 128 MB | Transcend, Panasonic |
| V1.0, V1.1 | MicroSD 256 MB | Transcend, Panasonic |
| V1.0, V1.1 | MicroSD 512 MB | Transcend, Panasonic |
| V1.0, V1.1 | MicroSD 1 GB | Transcend, Panasonic |
| V2.0 SDHC CLASS 6 | MicroSD 4 GB | Transcend |

- The DOS FAT file system is supported for the SD card.
- Folders/files stored in the SD card should be in the 8.3 filename format

2.3 Operator Control

2.3.1 LED Indication and Keys

| Keys | Function | | |
|---------------------------------------|------------------|--|-----------------------------------|
| LEDs | Status | | Indication |
| | | Green (solid) | Full charged |
| | | Green (solid) | 2/3 charged level |
| | | Green (solid) | 1/3 charged level |
| | | Green (blinking) | Low battery |
| | | Amber (solid) | Battery is charging |
| | Blue (solid) | Blue (solid) | Bluetooth device is ready |
| | Blue (blinking) | Blue (blinking) | Bluetooth device is communicating |
| | Blue (solid) | Blue (solid) | WiFi device is ready |
| | Blue (blinking) | Blue (blinking) | WiFi device is communicating |
| Note: WiFi device is optional. | | | |
| | Off | Printer is ready | |
| | Green (blinking) | - Printer is paused - Printer is downloading data | |
| | Red (solid) | - Media cover is open - Out of memory | |
| | Red (blinking) | - No paper - Paper jam | |
| | Amber (solid) | - Clean data - Printer is busy | |

2.3.2 LED Indication and Keys for LCD (Option)

| Keys | Function | |
|------|--|---|
| | <ul style="list-style-type: none"> - Display the printer information - Button for LCD setting menu | |
| | <ul style="list-style-type: none"> - Enter the printer setting menu - Button for LCD setting menu | |
| | <ul style="list-style-type: none"> - Press and hold for 2-3 seconds to turn on the printer - Press and hold for 2-3 seconds to turn off the printer - Button for LCD setting menu | |
| | <ul style="list-style-type: none"> - Ready status: Feed one label - Printing status: Pause the print job - Button for LCD setting menu | |
| LEDs | Status | Indication |
| | Off | Printer is ready |
| | Red (solid) | <ul style="list-style-type: none"> - Media cover is open - Out of memory - Clean data - Printer is busy |

Note: Please refer to the [section 6](#) for more details about LCD.

3. Setup

3.1 Install the Belt Clip and Battery

| | |
|---|--|
|  | <ol style="list-style-type: none">1. Insert the belt clip first. |
|  | <ol style="list-style-type: none">2. Insert the left side to install the battery at the rear of the printer. |
|  | <ol style="list-style-type: none">3. Push the right side of the battery. |

Battery safety warning:

DO NOT throw the battery in fire. DO NOT short circuit the contacts.

DO NOT disassemble the battery. DO NOT throw the battery in municipal waste.

The symbol of the crossed out wheeled bin indicates that the battery should not be placed in municipal waste.

3.2 Charge the Battery

It takes 5~6 hours to fully charge the battery before the first time usage. The lifetime of the battery is 300 times for charge/discharge cycles.

3.2.1 Charge the Battery

| | |
|---|--|
| | <ol style="list-style-type: none">1. The battery is installed into the printer. |
| | <ol style="list-style-type: none">2. Open the interface cover and plug the power cord to the power jack. |
| | <ol style="list-style-type: none">3. Plug the power cord into a properly power outlet. Note: Please switch OFF printer power prior to plug in the power cord to printer power jack. When the battery is charging, please do not remove the battery from the printer, otherwise, please re-plug the power cord into a power outlet. |
| <p>Standard panel:</p>  <p>LCD panel: (option)</p>  | <ol style="list-style-type: none">4. When the battery is changing, the color of battery status LED indicator is solid amber. Note: The battery is completely charged and the amber of LED indicator will turn to green. |

3.3 Loading the Media

3.3.1 Loading the Media

1. Open the printer media cover by pressing the media cover release button.

2. Pull the media holders apart to fit the label roll width.

3. Place the roll between the media holders and close them onto the core. Place the paper, printing side face up, and pull out enough paper over the print head.

4. Press each side of media cover to close the media cover and make sure the media cover closed correctly.

Note:

- * Please calibrate the gap/black mark sensor when changing media. Turn on the printer and open/close the media cover then it will calibrate the sensor automatically.
- * Please refer to video on [TSC YouTube](#) or driver CD.

3.3.2 Loading Media in Peel-off Mode

| | |
|---|--|
|  A photograph showing a hand holding a white media roll and inserting it into the top slot of a black TSC printer. The printer has a digital display and two buttons on the front panel. | <ol style="list-style-type: none">1. Please refer to subsection 3.3.1 to loading the media roll into the printer. <p>Note: Please calibrate the gap/black mark sensor after loading media in peel-off mode. Turn on the printer and open/close the media cover then it will calibrate the sensor automatically.</p> |
|  A photograph showing a hand peeling a white label from a blue liner sheet. The liner sheet is being held at an angle, and the label is being pulled away from it. The background shows the top of a black TSC printer. | <ol style="list-style-type: none">2. Remove 1~2 labels from the liner. |
|  A photograph showing the bottom view of a black TSC printer with a large grey media roll installed. Two red arrows point downwards towards the sides of the printer, indicating where to press the media cover to close it. | <ol style="list-style-type: none">3. Press each side of media cover to close the media cover and make sure the media cover closed correctly. |

4. Feed the liner go through the peeler module. (as figure shown)

5. Pull the liner tightly.

6. Move the peeler module to near the peeler bar by pushing each side of peeler module. (cover the platen roller)

7. Press down the peeler module to lock it.

Loose the peeler module in the reverse procedures:

3.3.3 Loading the Fan-fold/External Media

1. Open the printer media cover by pressing the media cover release button. Pull the media holders apart to fit the media width.

2. Push down each side of media holder lock switch to fix the media holder.

3. Feed the media through the rear external label entrance chute. Place the paper, printing side face up.

4. Press each side of media cover to close the media cover and make sure the media cover closed correctly.

Note:

Please calibrate the gap/black mark sensor when changing media. Turn on the printer and open/close the media cover then it will calibrate the sensor automatically.

3.3.4 Loading the Linerless Media (Option)

1. Please refer to [subsection 3.3.1](#) to loading the media roll into the printer.
2. Push down each side of media holder lock switch to fix the media holder for using linerless media.

3. Place the paper, printing side face up, and pull out enough paper over the print head.

4. Press each side of media cover to close the media cover and make sure the media cover closed correctly.

Note:

Please calibrate the gap/black mark sensor when changing media. Turn on the printer and open/close the media cover then it will calibrate the sensor automatically.

3.4 Connecting the Printer

The printer must establish communication with a host terminal which sends the data to be printed. There are three ways to connect for Alpha-4L series,

- * By a cable between the printer and its host terminal
- * By a Bluetooth short-range radio
- * By a Wireless LAN (Option)

3.4.1 Cable Communications

Open the interface cover and connect the printer to the computer/smart phone (host terminal) with USB cable. (USB to USB or USB to RS-232)

3.4.2 Wireless Communications with Bluetooth

1. Turn on the printer.
2. Open the Bluetooth device for host terminal to scan for printer's Bluetooth device.
3. Connect the Bluetooth devices. The Bluetooth LED will turn on blue (the Bluetooth icon will be shown for LCD panel) if devices have been paired.

| Printer Bluetooth default | |
|---------------------------|---|
| Address | You can find this info from configuration (self-test) page, please refer to section 4 for how to print out the self-test. |
| Name | BT-SPP |
| PIN | 0000 |

Note:

Please refer to [section 5.3](#) to change the name and PIN by DiagTool. If your printer supports the LCD, please refer the [section 6.3.5](#) to change the name and PIN directly.

3.4.3 Wireless Communications with Wi-Fi (Option)

You should set the WLAN settings via the cable for first using. Please refer to [section 5.4](#) to setting the Wi-Fi module. If your printer supports the LCD, please refer the [section 6.3.4](#) to set the WLAN settings.

3.5 Install the IP54-rated Environmental Case with Shoulder Strap (Option)

| | |
|--|---|
|  | <ol style="list-style-type: none">1. Open the case top cover. |
|  | <ol style="list-style-type: none">2. Put the printer into the case. |
|  | <ol style="list-style-type: none">3. Close the case top cover. The outside cover should be opened while printing. |

3.6 Install the Adapter for 0.75" and 1" Paper Core (Option)

1. Check the parts.

- Adapter x 2
- Screw x 2
- Nut x 2

2. Put the nut on the media holder.

3. Make the arrow direction is as fig. to install the adapter.

4. Pull the media holders apart.
Push down another side of media holder lock switch to keep the media holder in max width.

5. Tighten the screw on nut for fixing the adapter on media holder.

Note: Press the nut with hand when tighten the screw.

3.7 Install the Belt Strap (Option/ Standard for linerless model)

1. Tighten 2 screws on the printer.

2. Pull up the belt strap to lock it on the screws.

For linerless model

For standard model

3. Open the belt strap for using.

4. Power-on Utilities

There are three power-on utilities to set up and test printer hardware. These utilities are activated by pressing FEED button (✉) then turning on the printer power (⊕) simultaneously and release the button at different positions of LED indicator.

4.1 Power-on Utility for Standard Panel

Please follow the steps below for different power-on utilities.

1. Turn off the printer power switch.
2. Hold on the FEED button (✉) then turn on the power switch (⊕).
3. Release the power switch (⊕) when 1 LED color turn on amber.

Note: In this moment, you should still hold on the FEED button.

4. The printer will beep sound twice later, then release the button (✉) when battery LED indicates with different positions for each function.

| <i>Power on utilities for standard panel</i> | The battery LED light will be changed as following. | | |
|--|--|--|--|
| <i>LED</i> |  (5 blinks) |  (5 blinks) |  (5 blinks) |
| <i>Release FEED button (✉) for different functions</i> | Media sensor calibration (Please refer to 4.1.1) | Media sensor calibration, self-test and enter dump mode (Please refer to 4.1.2) | Printer initialization (Please refer to 4.1.3) |

4.1.1 Media Sensor Calibration

Please follow the steps below to calibrate the media sensor.

1. Turn off the printer power switch.
2. Hold on the FEED button () then turn on the power switch ().
3. Release the power switch () when  LED color turn on amber.

Note: In this moment, you should still hold on the FEED button.

4. The printer will beep sound twice later, then release the FEED button () when the indicator becomes  and blinking.
5. Printer will calibrate the gap/black mark sensor sensitivity.

Note: You also can do this function by open/close the media cover when turn on the printer.

- The LEDs will be changed as following figures:

Beep sound twice →  (5 blinks) →  (5 blinks) →  (5 blinks) → Turn on the printer

4.1.2 Self-test and Dump Mode

Please follow the steps below.

1. Turn off the printer power switch.
2. Hold on the FEED button () then turn on the power switch ().
3. Release the power switch () when  LED color turn on amber.

Note: In this moment, you should still hold on the FEED button.

4. The printer will beep sound twice later, then release the FEED button () when the indicator becomes  and blinking.
5. Printer will calibrate the sensor and print out the internal settings, then enter the dump mode.

Note: Turn off/on the power or press FEED button to resume printer from dump mode to normal printing mode. Please refer to [sections 4.3](#) and [4.4](#) for more details of self-test and dump mode.

- The LEDs will be changed as following figures:
Beep sound twice →  (5 blinks) →  (5 blinks) →  (5 blinks) → Turn on the printer

4.1.3 Printer Initialization

Printer initialization is used to clear DRAM and restore printer settings to defaults.

Printer initialization is activated by the following procedures.

1. Turn off the printer power switch.
2. Hold on the FEED button () then turn on the power switch ().
3. Release the power switch () when  LED color turn on amber.

Note: In this moment, you should still hold on the FEED button.

4. The printer will beep sound twice later, then release the FEED button () when the indicator becomes  and blinking.
5. Printer will restore printer settings to defaults.

Note: Please refer to section 4.5 for printer defaults.

- The LEDs will be changed as following figures:
Beep sound twice →  (5 blinks) →  (5 blinks) →  (5 blinks) → Turn on the printer

4.2 Power-on Utility for LCD Panel (Option)

Please follow the steps below for different power-on utilities.

1. Turn off the printer power switch.
2. Hold on the FEED button () then turn on the power switch ()
3. Release the power switch () when “Error” LED color turn on red.

Note: In this moment, you should still hold on the FEED button.

4. The printer will beep sound twice later, then release the button () when LCD indicate for different functions.

| <i>Power on utilities for LCD panel</i> | <i>The LCD will be changed as following.</i> | | |
|--|---|--|---|
| <i>LCD</i> |  |  |  |
| <i>Release FEED button () for different functions</i> | Media sensor calibration (Please refer to 4.2.1) | Media sensor calibration, self-test and enter dump mode (Please refer to 4.2.2) | Printer initialization (Please refer to 4.2.3) |

4.2.1 Media Sensor Calibration

Please follow the steps below to calibrate the media sensor.

1. Turn off the printer power switch.
2. Hold on the FEED button () then turn on the power switch ()
3. Release the power switch () when “Error” LED color turn on red.

Note: In this moment, you should still hold on the FEED button.

4. The printer will beep sound twice later, then release the FEED button () when LCD showing “Calibrate.....” .
5. Printer will calibrate the gap/black mark sensor sensitivity.

Note: You also can do this function by open/close the media cover when turn on the printer.

- The LCD will be changed as following:
Beep sound twice → **Calibrate..... (5 dots)** → Self Test..... (5 dots) → Initialize..... (5 dots) → Turn on the printer

4.2.2 Self-test and Dump Mode

Please follow the steps below.

1. Turn off the printer power switch.
2. Hold on the FEED button () then turn on the power switch ().
3. Release the power switch () when “Error” LED color turn on red.

Note: In this moment, you should still hold on the FEED button.

4. The printer will beep sound twice later, then release the FEED button () when LCD showing “Self Test.....” .
5. Printer will calibrate the sensor and print out the internal settings, then enter the dump mode.

**Note: Turn off/on the power or press FEED button to resume printer for normal printing.
(Ready mode) Please refer to [sections 4.3](#) and [4.4](#) for more details.**

- The LCD will be changed as following figures:

Beep sound twice → Calibrate..... (5 dots) → **Self Test..... (5 dots)** → Initialize..... (5 dots) → Turn on the printer

4.2.3 Printer Initialization

Printer initialization is used to clear DRAM and restore printer settings to defaults.

Printer initialization is activated by the following procedures.

1. Turn off the printer power switch.
2. Hold on the FEED button () then turn on the power switch () .
3. Release the power switch () when “Error” LED color turn on red.

Note: In this moment, you should still hold on the FEED button.

4. The printer will beep sound twice later, then release the FEED button () when the LCD showing “Initialize.....” .
5. Printer will restore printer settings to defaults.

Note: Please refer to [section 4.5](#) for printer defaults.

- The LCD will be changed as following figures:

Beep sound twice → Calibrate..... (5 dots) → Self Test..... (5 dots) → **Initialize..... (5 dots)** → Turn on the printer

4.3 Self-test

Printer will print the printer configuration after media sensor calibration. Self-test printout can be used to check if there is any dot damage on the heater element, printer configurations and available memory space.

Note: Self-test printout requires 4" wide paper width.

4.4 Dump mode

Printer will enter dump mode after printing printer configuration. In the dump mode, all characters will be printed in 2 columns as following. The left side characters are received from your system and right side data are the corresponding hexadecimal value of the characters. It allows users or engineers to verify and debug the program.

ASCII Data → ← Hex decimal data related to left column of ASCII data

2. Turn off / on the power or press FEED button to resume printer for normal printing.
(Ready mode)

4.5 Printer defaults

Printer configuration will be restored to defaults as below after initialization.

| Parameter | Default setting |
|----------------------|--|
| Speed | 50.8 mm/sec (2 ips) |
| Density | 8 |
| Media Width | 4" (101.5 mm) |
| Media Height | 4" (101.5 mm) |
| Sensor Type | Gap sensor |
| Print Direction | 0 |
| Reference Point | 0,0 (upper left corner) |
| Gap Offset | 0 |
| Post-Print Action | Tear mode |
| Serial Port Settings | 9600 bps, none parity, 8 data bits, 1 stop bit |
| Code Page | 850 |
| Country Code | 001 |
| Clear Flash Memory | No |

Note:

When printer initialization is done, please calibrate the gap or black mark sensor before printing.

5. Diagnostic Tool

TSC's Diagnostic Utility is an integrated tool incorporating features that enable you to explore a printer's settings/status; change a printer's settings; download graphics, fonts and firmware; create a printer bitmap font; and send additional commands to a printer. With the aid of this powerful tool, you can review printer status and setting in an instant, which makes it much easier to troubleshoot problems and other issues.

5.1 Start the Diagnostic Tool

1. Double click on the Diagnostic tool icon  DiagTool.exe to start the software.
2. There are four features (Printer Configuration, File Manager, Bitmap Font Manager, Command Tool) included in the Diagnostic utility.

5.2 Printer Function

1. Connect the printer and computer with a cable.

Note:

* The printer connects with the computer via USB to USB cable or USB to RS-232 cable (option).

2. Select the PC interface connected with bar code printer.

3. Click the “Printer Function” button to setup.
4. The detail functions in the Printer Function Group are listed as below.

| Printer Function | Function | Description |
|--------------------|--------------------|--|
| Calibrate Sensor | Calibrate Sensor | Calibrate the sensor specified in the Printer Setup group media sensor field |
| Ethernet Setup | Ethernet Setup | Setup the IP address, subnet mask, gateway for the on board Ethernet |
| RTC Setup | RTC Setup | Synchronize printer Real Time Clock with PC |
| Factory Default | Factory Default | Initialize the printer and restore the settings to factory default. |
| Reset Printer | Reset Printer | Reboot printer |
| Print Test Page | Print Test Page | Print a test page |
| Configuration Page | Configuration Page | Print printer configuration |
| Dump Text | Dump Text | To activate the printer dump mode. |
| Ignore AUTO.BAS | Ignore AUTO.BAS | Ignore the downloaded AUTO.BAS program |
| Exit Line Mode | Exit Line Mode | Exit line mode. |
| Password Setup | Password Setup | Set the password to protect the settings |

For more information about Diagnostic Tool, please refer to the diagnostic utility quick start guide in the CD disk \ Utilities directory.

5.3 Setting Bluetooth by Diagnostic Tool

1. Connect the printer and computer with a cable.

Note:

* The printer connects with the computer via USB to USB cable or USB to RS-232 cable (option).

2. Turn on the printer power switch.
3. Open Diagnostic tool and set interface. (The default setting is USB)

4. Select “Wireless” tab and click on “Built-in wireless module” item.
5. Enter the new BT Local Name or BT PIN Code in the editor.
6. Press “Set” button to set the new BT name or BT PIN code of the printer.
7. Press “Get” button to get back the settings. Make sure the Bluetooth module settings are set properly.

5.4 Setting Wi-Fi by Diagnostic Tool (Option)

1. Connect the printer and computer with the cable.

Note:

* The printer connects with the computer via USB to USB cable or USB to RS-232 cable (option).

2. Turn on the printer power switch.
3. Open Diagnostic tool and set interface. (The default setting is USB.)

4. Select “Wireless” tab and click on “Built-in wireless module” item.
5. Enter the new WLAN settings in the editor.
6. Press “Set” button to set the new settings to the printer.
7. The Wi-Fi LED will turn on blue (the Wi-Fi icon will be shown for LCD panel) if device has been connected.
8. Print out the self-test page to confirm if it's connected with right settings.
9. Remove the cable to print a data for test.

6. LCD Menu Function (Option)

The Alpha-4L series offer the LCD panel for selection to further enhance its capabilities to meet the demands of a wide range of printing solutions. This option feature includes LCD control panel, 4 buttons and 2 LED display. Please press the “M” button to enter the setting menu.

6.1 How to use the LCD to set the printer

Press the “M” button to display the function menu screen as following shown.

You can use this 4 buttons to scroll, select, enter or return the menu, depend on the icons from 4 sides of LCD. It was selected if the item with the black ground on the screen. The icon function is listed as below,

| Icon | Function |
|------|--|
| ! | Display printer information |
| 🔧 | Enter setting menu |
| ⏻ | Power switch |
| ↑ | Scroll up |
| ↓ | Scroll down |
| ↶ | Return to previous menu |
| → | Enter to next menu |
| ⬇ | Enter setting mode |
| ⬆ | Exit setting mode |
| 💾 | Save the selected settings and return to previous menu |
| ✓ | Select |
| ○ | Alter to OFF |
| ● | Alter to ON |

For example:

Change the speed setting, please following steps as below.

1. Press “M” button to enter the setting menu. Press  button to enter the “Setup” item.

2. Press  button to enter the “Print Setup” item. Select the “TSPL2” item. Enter the “Speed” setting mode.

3. At this status, you can scroll up or scroll down to select the value of print speed. Then press the  button to save the selected value into the printer. Press “

The image shows two screenshots of the printer's LCD screen. The first screenshot shows the 'TSPL2' menu with 'Speed' selected (highlighted with a red box). The second screenshot shows the 'TSPL2' menu with 'Speed' set to '3' (highlighted with a red box), indicating the value has been saved.

6.2 Main Menu Overview

There are 5 categories for the main menu. You can easily set the settings of printer without connecting the computer. Please refer to following sections for more details.

Note:

* The Wireless LAN function is optional for Alpha-4L series.

6.3 Setup

This “Setup” category can set up the sensor, serial comm., wireless, Bluetooth, date time and display settings.

6.3.1 Printer Setup

6.3.1-1 Printer setup for TSPL2

| Item | Description | Default |
|-----------|--|---------|
| Speed | Use this item to setup print speed. The each increase or decrease is 0.5 ips. Available setting is from 1 to 6. | 2 |
| Density | Use this option to setup printing darkness. The available setting is from 0 to 15, and the step is 1. You may need to adjust your density based on selected media. | 8 |
| Direction | The direction setting value is either 1 or 0. Use this item to setup the printout direction.  | 0 |

| | | | |
|--------------------|---|--|-------------------|
| Print mode | This item is used to set the print mode. There are 3 modes as below, | | Batch Mode |
| | Printer Mode | Description | |
| | None | Next label top of form is aligned to the print head burn line location. (Tear Off Mode) | |
| | Batch Mode | Once image is printed completely, label gap/black mark will be fed to the tear plate location for tear away. | |
| | Peeler Mode | Enable the label peel off mode. | |
| Offset | This item is used to fine tune media stop location. Available setting value is from "+" to "-" or "0" to "9". | | +000 |
| Shift X | This item is used to fine tune print position. Available setting value is from "+" to "-" or "0" to "9". | | +000 |
| Shift Y | | | +000 |
| Reference X | This item is used to set the origin of printer coordinate system horizontally and vertically. Available setting value is from "0" to "9". | | 000 |
| Reference Y | | | 000 |
| Code page | Use this item to set the code page of international character set. | | 850 |
| Country | Use this option to set the country code. | | 001 |

Note: If printing from enclosed software/driver, the software/driver will send out the commands, which will overwrite the settings set from the panel.

6.3.1-2 Printer setup for ZPL2

| Item | Description | Default | | | | | | |
|---------------|---|--------------|-------------|---------------|---|-------------|---------------------------------|----------|
| Density | Use this item to setup printing darkness. The available setting is from 0 to 30, and the step is 1. You may need to adjust your density based on selected media. | 16 | | | | | | |
| Print Speed | Use this item to setup print speed. The each increase or decrease is 1 ips. Available setting is from 1 to 6. | 2 | | | | | | |
| Tear Off | This item is used to fine tune media stop location. Available setting value is from "+" to "-" or "0" to "9". | +000 | | | | | | |
| Print mode | <p>This item is used to set the print mode. There are 2 modes as below,</p> <table border="1"> <thead> <tr> <th>Printer Mode</th><th>Description</th></tr> </thead> <tbody> <tr> <td>Tear Off Mode</td><td>Next label top of form is aligned to the print head burn line location.</td></tr> <tr> <td>Peeler Mode</td><td>Enable the label peel off mode.</td></tr> </tbody> </table> | Printer Mode | Description | Tear Off Mode | Next label top of form is aligned to the print head burn line location. | Peeler Mode | Enable the label peel off mode. | Tear Off |
| Printer Mode | Description | | | | | | | |
| Tear Off Mode | Next label top of form is aligned to the print head burn line location. | | | | | | | |
| Peeler Mode | Enable the label peel off mode. | | | | | | | |
| Print Width | This item is used to set print width. The available value is from "0" to "9". | 812 | | | | | | |
| List Fonts | This feature is used to print current printer available fonts list to | N/A | | | | | | |

| | the label. The fonts stored in the printer's DRAM, Flash or optional memory card. | | | | | | | | | | | |
|-----------------------|---|--------------|-------------|------|--------------------------------|-------------|---|--------|---|-----------|-----------------------------|------------------|
| List Images | This feature is used to print current printer available images list to the label. The images stored in the printer's DRAM, Flash or optional memory card. | N/A | | | | | | | | | | |
| List Formats | This feature is used to print current printer available formats list to the label. The formats stored in the printer's DRAM, Flash or optional memory card. | N/A | | | | | | | | | | |
| List Setup | This feature is used to print current printer configuration to the label. | N/A | | | | | | | | | | |
| Control Prefix | This feature is used to set control prefix character. | N/A | | | | | | | | | | |
| Format Prefix | This feature is used to set format prefix character. | N/A | | | | | | | | | | |
| Delimiter Char | This feature is used to set delimiter character. | N/A | | | | | | | | | | |
| Media Power Up | <p>This option is used to set the action of the media when you turn on the printer.</p> <table border="1"> <thead> <tr> <th>Selections</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>Feed</td> <td>Printer will advance one label</td> </tr> <tr> <td>Calibration</td> <td>Printer will calibration the sensor levels, determine length and feed label</td> </tr> <tr> <td>Length</td> <td>Printer determine length and feed label</td> </tr> <tr> <td>No Motion</td> <td>Printer will not move media</td> </tr> </tbody> </table> | Selections | Description | Feed | Printer will advance one label | Calibration | Printer will calibration the sensor levels, determine length and feed label | Length | Printer determine length and feed label | No Motion | Printer will not move media | No Motion |
| Selections | Description | | | | | | | | | | | |
| Feed | Printer will advance one label | | | | | | | | | | | |
| Calibration | Printer will calibration the sensor levels, determine length and feed label | | | | | | | | | | | |
| Length | Printer determine length and feed label | | | | | | | | | | | |
| No Motion | Printer will not move media | | | | | | | | | | | |
| Head Close | <p>This option is used to set the action of the media when you close the print head.</p> <table border="1"> <thead> <tr> <th>Selections</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>Feed</td> <td>Printer will advance one label</td> </tr> <tr> <td>Calibration</td> <td>Printer will calibration the sensor levels, determine length and feed label</td> </tr> <tr> <td>Length</td> <td>Printer determine length and feed label</td> </tr> <tr> <td>No Motion</td> <td>Printer will not move media</td> </tr> </tbody> </table> | Selections | Description | Feed | Printer will advance one label | Calibration | Printer will calibration the sensor levels, determine length and feed label | Length | Printer determine length and feed label | No Motion | Printer will not move media | No Motion |
| Selections | Description | | | | | | | | | | | |
| Feed | Printer will advance one label | | | | | | | | | | | |
| Calibration | Printer will calibration the sensor levels, determine length and feed label | | | | | | | | | | | |
| Length | Printer determine length and feed label | | | | | | | | | | | |
| No Motion | Printer will not move media | | | | | | | | | | | |
| Label Top | This option is used to adjust print position vertically on the label. The range is -120 to +120 dots. | 0 | | | | | | | | | | |
| Left Position | This option is used to adjust print position horizontally on the label. The range is -9999 to +9999 dots. | +0000 | | | | | | | | | | |

Note: If printing from enclosed software/driver, the software/driver will send out the commands, which will overwrite the settings set from the panel.

6.3.2 Sensor

| Item | Description | Default |
|-------------------------|---|---------|
| Auto Calibration | This item is used to set the media sensor type and calibrate the selected sensor. Printer will feed 2 to 3 gap labels to calibrate the sensor sensitivity automatically. | N/A |
| Manual Setup | In case "Auto Calibration" cannot apply to the media, please use "Manual Setup" function to calibrate the sensor manually. Please follow the shown step from LCD to do. Note: You can open the media cover to move the paper but have to close the media cover for each scan. | N/A |
| Threshold | This item is used to fix the calibrated sensor sensitivity. | Auto |
| Maximum Length | This item is used to set the max. calibrate length. | 152 |
| Advanced | This item is used for pre-printed paper. If this advanced function is turned "ON" then you can setup the min. paper and max. gap/black mark size. | OFF |

6.3.3 Serial Comm.

| Item | Description | Default |
|-------------|--|---------|
| Baud Rate | This item is used to set the RS-232 baud rate. | 9600 |
| Parity | This item is used to set the RS-232 parity. | None |
| Data Bits | This item is used to set the RS-232 Data Bits. | 8 |
| Stop Bit(s) | This item is used to set the RS-232 Stop Bits. | 1 |

6.3.4 Wireless LAN

| Item | Description | Default |
|----------------|---|----------------|
| Operating Mode | <p>This item is used to set the operating mode of wireless local area networks to connect devices to the networks.</p> <p>Note: Infrastructure mode requires the use of an access point for this communication to take place. Ad hoc mode involves connecting a computer directly to another computer.</p> | Infrastructure |
| Scan AP | This item is used to scan the access point device | N/A |
| DHCP | This item is used to ON or OFF the DHCP (Dynamic Host Configuration Protocol) network protocol. | ON |

6.3.5 Bluetooth

| Item | Description | Default |
|-------------------|--|---------------|
| Local Name | This item is used to set the local name for Bluetooth. | BT-SPP |
| PIN Code | This item is used to set the local PIN code for Bluetooth. | 0000 |

6.3.6 Date Time

| Item | Description | Default |
|-------------|---|------------|
| Date | This item is used to set the date. (ex: 2013-05-30) | N/A |
| Time | This item is used to set the time. (ex: 19:20:02) | N/A |

6.3.7 Display

| Item | Description | Default |
|------------------|--|-------------------|
| Contrast | This item is used to set the contrast for display. | 50 |
| Backlight | This item is used to set the backlight time for display. | 10 Seconds |

6.4 File Manager

This feature is used to check the printer available memory and file list.

| Item | Description |
|-------|---|
| DRAM | Use this menu to show available memory space and run (.BAS) the files saved in the printer DRAM memory. |
| FLASH | Use this menu to show available memory space and run (.BAS) the files saved in the printer Flash memory. |
| CARD | Use this menu to show available memory space and run (.BAS) the files saved in the printer MicroSD card memory. |

6.5 Diagnostics

6.5.1 Print Config.

This feature is used to print current printer configuration to the label. On the configuration printout, there is a print head test pattern, which is useful for checking if there is any dot damage on the print head heater element. Please refer to [section 4.3](#) for more details.

6.5.2 Dump Mode

Captures the data from the communications port and prints out the data received by printer. In the dump mode, all characters will be printed in 2 columns. (Please refer to [section 4.4](#)) The left side characters are received from your system and right side data are the corresponding hexadecimal value of the characters. It allows users or engineers to verify and debug the program.

Note:
Dump mode requires 4" wide paper width.

6.5.3 Battery

This feature is used to check the printer battery voltage.

6.5.4 Print Head

This feature is used to check the printer temperature, resistance, and bad dots for print head.

6.6 Language

This option is used to setup the language on LCD display.

6.7 Service

This feature is used to restore printer settings to defaults. Please refer to [section 4.5](#).

Note:

When printer initialization is done, please calibrate the gap or black mark sensor before printing.

7. Troubleshooting

The following guide lists the most common problems that may be encountered when operating this bar code printer. If the printer still does not function after all suggested solutions have been invoked, please contact the Customer Service Department of your purchased reseller or distributor for assistance.

| Problem | Possible Cause | Recovery Procedure |
|---|---|---|
| Power indicator does not illuminate | * The battery is not properly installed. * Battery out of power. * The battery is dead. | * Reinstall the battery. * Switch the printer on. * Charge the battery. * Replace a new battery. |
| Not Printing | * Check if interface cable is well connected to the interface connector. * Check if wireless or Bluetooth device is well connected between host and printer. * The port specified in the Windows driver is not correct. | * Re-connect cable to interface. * Please reset the wireless device setting. * Select the correct printer port in the driver. |
| No print on the label | * Label loaded not correctly. * Use wrong type paper | * Follow the instructions in loading the media. * Use thermal type paper |
| The printer status from DiagTool or LCD shows “ Head Open ”. | * The printer carriage is open. | * Please close the print carriage. |
| The printer status from DiagTool or LCD shows “ Out of Paper ”.. | * Running out of media roll. * The media is installed incorrectly. * Media sensor is not calibrated. | * Supply a new media roll. * Follow the instructions in loading the media to reinstall the media roll. * Calibrate the media sensor. |
| The printer status from DiagTool or LCD shows “ Paper Jam ”. | * Media sensor is not set properly. * Make sure media size is set properly. * Label may be stuck inside the printer mechanism. | * Calibrate the media sensor. * Set media size correctly. * Remove the stuck label inside the printer mechanism. |
| The printer status from LCD shows "Strong light. Press FEED to print." | * Peel-off sensor can't work in strong light place. | * Remove the printer to proper place to print for peer-off mode. |
| Can't downloading the file to memory (FLASH / DRAM/CARD) | * The space of memory is full. | * Delete unused files in the memory. * The max. numbers of DRAM is 256 files. * The max. user addressable memory space of DRAM is 2048KB. * The max. numbers of file of FLASH is 256 files. * The max. user addressable memory space of FLASH is 14336KB. |

| | | |
|--|---|--|
| Poor Print Quality | <ul style="list-style-type: none"> * Media is loaded incorrectly * Dust or adhesive accumulation on the print head. * Print density is not set properly. * Print speed is not set properly. * Print head element is damaged. | <ul style="list-style-type: none"> * Reload the supply. * Clean the print head. * Clean the platen roller. * Adjust the print density and print speed. * Run printer self-test and check the print head test pattern if there is dot missing in the pattern. * Change proper media roll. |
| Missing printing on the left or right side of label | <ul style="list-style-type: none"> * Wrong label size setup. | <ul style="list-style-type: none"> * Set the correct label size. |
| Gray line on the blank label | <ul style="list-style-type: none"> * The print head is dirty. * The platen roller is dirty. | <ul style="list-style-type: none"> * Clean the print head. * Clean the platen roller. <p>Please refer to section 8</p> |
| Irregular printing | <ul style="list-style-type: none"> * The printer is in Hex Dump mode. | <ul style="list-style-type: none"> * Turn off and on the printer to skip the dump mode. |

8. Maintenance

This session presents the clean tools and methods to maintain your printer.

1. Please use one of following material to clean the printer.

- Cotton swab
- Lint-free cloth
- Vacuum / Blower brush
- 100% Ethanol or Isopropyl Alcohol

2. The cleaning process is described as following,

| Printer Part | Method | Interval |
|---------------|---|--|
| Print Head | <ol style="list-style-type: none">1. Always turn off the printer before cleaning the print head.2. Allow the print head to cool for a minimum of one minute.3. Use a cotton swab and 100% Ethanol or Isopropyl Alcohol to clean the print head surface. | Clean the print head when changing a new label roll. |
| Print Head |  | |
| Platen Roller | <ol style="list-style-type: none">1. Turn the power off.2. Rotate the platen roller and wipe it thoroughly with water. | Clean the platen roller when changing a new label roll |
| Peel Bar | Use the lint-free cloth with 100% ethanol to wipe it. | As needed |
| Sensor | Compressed air or vacuum | Monthly |
| Exterior | Wipe it with water-dampened cloth | As needed |
| Interior | Brush or vacuum | As needed |

Note:

- Do not touch printer head by hand. If you touch it careless, please use ethanol to clean it.
- Please use 100% Ethenol or Isopropyl Alcohol. DO NOT use medical alcohol, which may damage the printer head.
- Regularly clean the print head and supply sensors once change a new media to keep printer performance and extend printer life.
